

**AMENDMENTS TO THE CLAIMS**

1. (Original) A nonaqueous gel composition for tooth whitening comprising (A) a tooth whitening ingredient having a relative permittivity of 17.0 to 43.0 (at 25°C) and a vapor pressure of 0 to 7000 kPa (at 25°C), (B) a substance which dissolves in said tooth whitening ingredient and is precipitated by an aqueous solution of calcium chloride, and (C) a gelling agent, said composition being substantially free of water and peroxide.
2. (Original) The nonaqueous gel composition for tooth whitening as defined in claim 1, wherein the tooth whitening ingredient (A) is at least one selected from the group consisting of isopropanol, butanol, ethylene glycol, polyethylene glycol (with an average molecular weight of 190 to 630), diethylene glycol, propylene glycol, dipropylene glycol, butylene glycol, and glycerin.
3. (Original) The nonaqueous gel composition for tooth whitening as defined in claim 1 or claim 2, wherein the substance (B) which dissolves in the tooth whitening ingredient and is precipitated by an aqueous solution of calcium chloride is at least one selected from the group consisting of C<sub>14-22</sub> higher fatty acids and/or acrylic acid copolymers.
4. (Original) The nonaqueous gel composition for tooth whitening as defined in claim 3, wherein the substance (B) is at least one selected from the group consisting of myristic acid, 7-hydroxymyristic acid, jalaric acid, 9,10,16-trihydroxypalmitic acid, palmitoleic acid,

12-hydroxystearic acid, isostearic acid, oleic acid,  
linoleic acid, linolenic acid, erucic acid, shellac,  
t-Bu acrylate/ethyl acrylate/methacrylic acid copolymer,  
methyl acrylate/methacrylic acid copolymer,  
methyl methacrylate/methacrylic acid copolymer,  
acrylic acid/acrylamide/ethyl acrylate copolymer,  
octylacrylamide/acrylate ester copolymer,  
methyl methacrylate/ethyl acrylate/methacrylic acid trimethylammonium ethyl chloride  
copolymer.

5. (Currently Amended) The nonaqueous gel composition for tooth whitening as defined in ~~any one of claims 1 to 4~~ claim 1, wherein the gelling agent (C) is at least one selected from the group consisting of polyacrylic acid, carboxyvinyl polymer, hydroxypropyl cellulose, carboxymethyl cellulose, and salts thereof.

6. (Currently Amended) The nonaqueous gel composition for tooth whitening as defined in ~~any one of claims 1 to 5~~ claim 1, wherein the tooth whitening ingredient (A) accounts for 50.0 to 99.5 % by weight of the total amount of the composition, the substance (B) accounts for 0.1 to 10 % by weight of the total amount of the composition, and the gelling agent (C) accounts for 0.1 to 15 % by weight of the total amount of the composition.

7. (Currently Amended) The nonaqueous gel composition for tooth whitening as defined in ~~any one of claims 1 to 6~~ claim 1, which further comprises a surfactant that accounts for 0.05 to 5 % by weight of the total amount of the composition.

8. (Currently Amended) A tooth whitening set comprising the nonaqueous gel composition for tooth whitening defined in ~~any one of claims 1 to 7~~ claim 1 and a tool for its application which is detachably fitted to teeth while holding it.

9. (Original) The tooth whitening set as defined in claim 8, wherein the tool for application is any of tape, sheet, film, mouth tray, mouth piece, sponge, impression material, pack material, and tooth cover conforming to the dentition, which are all made of water-insoluble material.  
position.
